

2.7 Student Satisfaction Survey

2.7.1 Student Satisfaction Survey (SSS) on overall institutional performance (Institution may design the questionnaire) (results and details be provided as web link)

The College collected feedback from the students regarding their views, observations and suggestions pertaining to teaching learning process, infrastructure and other parameters for the college and hostel. Their responses regarding the same were analyzed by the committee and necessary actions were taken. The majority of them strongly agree that the institution provides multiple opportunities to learn and grow. The teachers use student centric methods such as experimental learning, participatory learning and problem solving methodologies for enhancing learning experiences. Efforts are made by the institute/teachers to inculcate life skills and employability skills to make students ready for the world of work.

The overall quality of the teaching and learning process in the institute has been found to be very good. Majority of the teachers use ICT tools as LCD projector multimedia etc. while teaching. Complaint and suggestion boxes are used to report grievances/issues. The students feel satisfied as their issues are amicably resolved by the college authorities at the earliest. Students also admired the friendly approach of the teachers towards the students.

The students demanded more courses related to Employability skills. They also demanded more frequent use of ICT tools in classes. More emphasis should be laid on skill based learning & promoting entrepreneurial skills. The students also demanded more cultural events, industrial visits, motivational speech by professional speakers etc. The students wanted more extra-curricular activities in the college so that a balance can be maintained between studies as well as in extra-curricular activities. The students also demanded more indoor sports facilities.
